

Australian Mining Conferences 2016

A quick easy to follow list of some of the main mining conferences being held in Australia that as an investor you should attend

Gold's China syndrome

The continued rise of China and its passion for gold has introduced a cultural revolution into investment.

China's ambitious move to exert more control over the pricing of gold – its launch in April of the yuan-denominated price fix - has sparked concerns that the Shanghai Gold Exchange will suck up a lot of the world's physical gold.

This year's Precious Metals Investment Symposium in Sydney in October, whose theme is "investing for real wealth in a volatile global market", will provide insights into the effects that China and other key players will likely have on gold.

International speakers will join local experts at the conference, which will bring together every aspect of the precious metals investment industry – explorers, producers, bullion companies, hard-asset investment vehicles, coin dealers and investors.

This is the 9th year for Australia's largest precious metals event. It will be at

Sydney's Four Points by Sheraton on 10-11 October.
